"My theory," said Chief Beattie today, "is that the murderer held the woman by the hair while he killed her with an axe or a hatchet. Then he carried her body from one of the canalboats and threw it on the track. That part of the yards is a lonely spot.

Another Murder Argument. "The finding of the clothing near the

When the body was found by Con ductor Ringleid he summoned Assistant Despatcher Lyons, and they examined every inch of ground near by in a vain search for some clue that would indicate how the woman had met death. They notified the Jersey City authorities instead of calling up Headquarters at Hoboken. As a result the body was taken to the Jersey City Morgue.

Try to Solve Mystery.

The Jersey City police notified the Hoboken Detective Bureau and work on the mystery was begun immediately. A policeman in plain clothes was sent to Jersey City Morgue to wait for possible identification of the body. Coroner George Brackner, of Jersey City, does not agree with the murder

"Of course," he said to-day, "it is not impossible that the woman was murdered, although I think she was hit by a train. In support of the murder theory is the fact that her dress was found lifty yards east of the track and her feeble voice, quavering with emotion. ory is the fact that her dress was found fifty yards east of the track and her shawl and hat fifty feet to the west. On the other hand, I don't see how the murderer could have carried the body to the spot without attracting attention. It was only 6.20 o'clock last evening when the body was found. I think the woman was the wife of a night railroad employee who had delivered supper to her husband when she met with death."

Chief of Police Hayes, of Hoboken, and Chief Murphy, of Jersey City, had a dozen men and women at the Morgue to-day to identify the woman, but none of them knew her. Chief Murphy is inclined to the murder theory.

He and his detectives were searching among the canal-boats to-day in the hope of finding some clue that will clear up the mystery.
